

FACILITY OWNERS AND MANAGERS

Do you carry out any of these activities?

- consigning or receiving livestock
- loading or unloading livestock
- own or manage a facility where heavy vehicles regularly load or unload livestock.

If so, you are a CoR party, and you have obligations under the HVNL.

Do you know how you can make transporting livestock safer?

- Consider the types and volume of heavy vehicles that will access the facility when configuring premises and developing procedures.
- Make sure loading and unloading facilities are safe and well-maintained, including having enough ramps.
- Look for ways to minimise wait times and queuing on premises.
- Make sure wash bays and effluent disposal facilities are well maintained, operational and sufficient to manage the expected workload.
- Provide drivers access to amenities such as showers, rest areas and food.
